## Commercial Pilot Licence – Aeroplane

### Pre-Requisites:

There is no requirement regarding education other than that you must be able to read and write one of Canada's official languages. However, having a University Degree or at least having graduated from High School is a definite plus on the job market.

Minimum age: 18 years

Transport Canada category 1 medical certificate

Private Pilot Licence

### Requirements:

80 hours commercial pilot ground school (following the issue of a PPL)

200 hours flight time, of which at least:

35 hours must be with an instructor (dual)

100 hours must be as pilot in command (solo)

20 hours must be cross country experience

20 hours of Instrument training

### Minimum CPL course cost:

Piper Cherokee	
Private Pilot Licence:	\$10,700.00
60 hrs dual instruction @ \$250/hr:	\$15,000.00
85 hrs solo @ \$180/hr:	\$15,300.00
10 hours instrument training(sim):	\$950.00
10 hours instrument training(airplane):	\$2,500.00
<b>Total:</b>	<b>\$44,500.00*</b>

All rates are wet (include fuel/oil costs) but do not include GST.

The night rating and all required cross-country training are included in the hourly breakdown.

\*This is the minimum cost for a Commercial Pilot Licence. In our experience, the average student without previous flying experience will take longer and can expect a more *realistic* cost would be between **\$45,000.00 and \$50,000.00**. In Canada, all time obtained on the Recreational Pilot Permit or the Private Pilot Licence counts toward the 200 hours required for the Commercial Pilot Licence.

### Courses may be paid:

- a) as you go
- b) by a deposit of a given amount
- c) by a deposit of total amount

**Refund Policy:** A full refund will be given for unused deposits if the student withdraws from the course.

**Privileges:** This licence allows you to work as a pilot for reward or hire.
